Subject: RETURN OF DAMAGED TRANSFORMERS.

It has been observed during inspection of damaged transformers at Field/Regional Stores that more than 50% of damaged transformers are declared irreparable due to:

- i) Un-authorized opening and mis-handling.
- ii) Missing laminations of core, missing windings etc.
- iii) Draining out of the transformer oil.

These irreparable declared transformers are disposed off at SCRAP rate whereas if un-authorized opening & mis-handling have been avoided these transformers would have been got reclaimed at a cost less than 50% cost of the new transformers. This is not only causing a huge loss to Authority but also creating a shortage of reclaimed transformers in the field.

You are requested to please ensure that the damaged transformers are immediately shifted to Field/Regional Stores so as the same could be got reclaimed to meet Field emergent requirement. Special attention is invited to return the 100 KVA and 200 KVA damaged transformers for reclamation as desired by Managing Director (Distribution) WAPDA.

SUBJECT:- RETURN OF DAMAGED TRANSFORMERS.

It is disappointing to note that damaged transformers are not being returned to store by the field formations. This is a clear violation of standing instructions of Authority and requires your immediate attention. During the recent past hundreds of new transformers have been issued but none of the S.D.O. has returned the damaged transformers creating acute shortage of distribution Transformers for replacement.

It is therefore requested that all damaged transformers lying at different sites, Sub Divisions and other places be immediately shifted to the concerned field stores/Regional Stores for transporting them to reclamation workshop Nowshera. In order to meet with immediate requirement of transformers. In future field store/Regional stores are being directed not to issue new transformers until the damaged transformers is returned to the stores.
